A. Actors (The "Who")

These are the entities interacting with the system.

1. **ATM User (Customer):** The primary user interacting with the interface.
2. **Bank Administrator/Security:** Monitors the dashboard and receives evidence.
3. **Law Enforcement (Police):** Receives the SOS alerts and location data.
4. **Intruder (Malicious Actor):** Attempting physical attacks (drilling, gas cutting) or threats.
5. **Sensors/Camera (External Systems):** The Vibration Sensors and CCTV Camera act as initiators for automated use cases

B. Use Cases (The "What")

These are the specific functions the system performs.

1. **Enter Panic PIN:** The user enters a reverse or distress code.
2. **Detect Suspicious Behavior:** The system identifies weapons or masks via ML.
3. **Detect Physical Tampering:** The system detects vibrations or tilting.
4. **Activate Lockdown Mode:** The system locks the booth/door via servo motors.
5. **Send SOS Alert:** The system sends SMS/Voice alerts to Police and Bank.
6. **Monitor Live Feed:** Bank admin views real-time surveillance.
